CSE 435  
Project Questions

Questions:

- ⑩ Does the area of a dot correspond to the severity of the paint defect?
- ⑩ What are all the severity categories?
- ⑩ What is the meaning of 'Sev 1' and 'Sev 5'?
- ⑩ What is the meaning of 'VSI'?

Risk:

- ⑩ It may be difficult to translate/input severity and type of defect in an intuitive way. I think a large portion of development time will be devoted to the UI/ease of use.w
